

Holder for Solar- and collector installations

REES

Original REES-Products!
Only genuine with this sign!

For standing seam and clamping-seam profile

REES-Solar holder

- installation by clamping-method without damaging the roof-layer
- available in different designations and materials

For standing seam:

- Aluminium
- Copper
- Stainless Steel
- zinc

For Profile sheet roofings:

- Aluminium
- z.B. Bemo®
- Kalzip® and similar

Our solar holders are available in different heights to achieve a slightly elevated installation of each solar module on the ridge side, to avoid that snow slips uncontrolled down the roof.

Did you think about a fitting snow-retention-system in the course of planing your solar-plant? We have a sophisticated idea for you!

Added to the certification on DIN EN ISO 9001, we are certified in regular terms by the german Technical Inspection Agency.

We are looking forward to advise you.
